<u>How to use the Rosary on SMART Board</u>

Once you have set up and calibrated your computer and SMART Board, open the file for "**Rosary for SMARTBoard 1.**"

How use the SMART Board Rosary:

1. Touch each bead as your class prays the rosary (each bead will light up as you go along to help you keep track visually.)

2. If your class needs to read along with the prayer:

   a. Take your finger and drag the prayer pull tab to the centre of the screen.

   b. When your class is done with the prayer, take your finger and drag it back to the side so you can see the rosary again.
